1. This Office action is in response to the amendment filed 1/9/04.
2. The drawings are objected to because the proper term to be added to drawings that illustrate what is already known is "Prior Art", not "Relevant Art". A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
3. Claims 1-63 and 88-109 are generic to a plurality of disclosed patentably distinct species comprising various heterogeneous catalyst compositions having a variety of anionic entities bonded to a support and balanced by a variety of group 2 metal ions. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. It is urged that applicants elect a hierarchy of species in order to expedite prosecution.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
4. A telephone call was made to Joel Armstrong, Esq., on 4/20/04 to request an oral election to the above restriction requirement, but did not result in an election being made.
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
